Business Plan 2023 – 2025

Call for Proposals addressed to EIT Community NEB partners to Enhance NEB:

Scaling-up the most promising Connect NEB and Co-create NEB projects

Call Manual

EIT Community NEB:

EIT Urban Mobility

EIT Climate KIC

EIT FOOD

Barcelona| 31 May 2023

History of changes

Version	Publication Date	Change
1.0	31.05.2023.	Initial version

Any updates on this Call Manual, if any, are identified in the table above. Amended versions of the Call Manual are published on the EIT Urban Mobility, EIT Climate KIC and EIT FOOD website.

Content

Abbreviations

EIT	European Institute of Innovation & Technology (EIT)
BP	Business Plan
CfP	Call for Proposals
Coordinating KIC	The KIC that coordinates the grant of a project
EEE	External Expert Evaluator
EIT Community NEB	In this Call, EIT Community refers to EIT Urban Mobility, EIT Climate-KIC, EIT Food
FSM	Financial Sustainability Mechanism
HE	Horizon Europe
HEI CBI	Higher Education Institutions Capacity Building Initiative
KIC	Knowledge and Innovation Community
KPIs	Key Performance Indicators
MGA	Model Grant Agreement
NEB	New European Bauhaus initiative
SA	Strategic Agenda
SER	Summary Evaluation Report
SO	Strategic Objectives

Glossary

Project Leader	The Project Leader is the central contact point for EIT Community NEB[1] from the proposal submission stage to the end of the project implementation. The Project Leader represents the project and the consortium partners (the other partners participating in the project) towards EIT Community NEB, and also has responsibility for creating and submitting a proposal.
Call for Proposals	The Call for Proposals is the instrument used to allocate funding by EIT Community NEB to third parties to support the deployment and development of the Strategic Agenda through projects.
Call Manual	The Call Manual is the document where the terms, conditions, and criteria of any Call for Proposals are defined and stated according to the principles of transparency, equal treatment, open competition, and sound procedural management.
Deliverable	Deliverables are tangible or intangible goods or services produced at a given moment during the project implementation. Deliverables chart the path to reach project objectives and could be a report, a document, a software product, a course, an event or any other building block of

---

[1] EIT Urban Mobility, EIT Climate-KIC, EIT Food

	a project. The deliverables specified need to fully demonstrate the achievements of the activity and judicious use of public funds.
EIT KPIs	Set of Key Performance Indicators (KPIs) defined by the EIT that reflects the EIT operational objectives for education, entrepreneurship, and innovation. These KPIs are used to measure how effectively a KIC/project is meeting the objectives of the EIT.
EIT Community NEB	In this Call, EIT Community refers to EIT Urban Mobility, EIT Climate-KIC, EIT Food
Evaluation Process	Process by which EIT Community NEB examines the quality of a proposal to decide if it should be selected to receive EIT funding.
Evaluation Panel	Group of external expert evaluator (EEE) and rapporteur, with specific expertise in a specific area/segment of the Call, aiming to evaluate a set of eligible proposals submitted to a Call.
Horizon Europe Model Grant Agreement	The Horizon Europe Model Grant Agreement (HE MGA) sets out the rights and obligations and terms and conditions applicable to the grant awarded.
KIC Specific KPIs	Set of indicators defined by EIT Community NEB that reflects the societal challenge that the KIC is trying to address.
Knowledge triangle integration	EIT Community NEB aims to gather close-knit partnerships of European education, research and business entities (knowledge triangles) and also involves cities, either in the composition of the members of the projects or through the expected impact of the projects' results.
Milestone	Control points to chart progress. They may correspond to the completion of a key deliverable that allows the next phase of work to begin.
Ranking list	List of proposals in order of scoring after the Selection Committee assessment.
Selection Committee	The Selection Committee is responsible for the selection of shortlisted proposals and the definition of requirements for the inclusion of the selected proposals in the final EIT Community NEB's portfolio of projects.
Summary Evaluation Report	A single and final Summary Evaluation Report (SER) per proposal is produced by the Rapporteur after the consensus meetings. This document summarizes the final score, the strengths, weaknesses, risks, and potential recommendations of a proposal.

Introduction

The **Enhance NEB Call for proposals 2023** is a new competitive mechanism mainly addressed to the EIT Community NEB partners to scale up Citizen Engagement Activities [hereinafter Connect NEB] and Co-creation of public space [hereinafter Co-create NEB] projects implemented in the previous Business Plan 2021-22.

A total of **six projects** will be selected to either strengthen their impact more holistically within the same project location or replicate them to amplify their impact in a new area. It's a competitive[2] Call for Proposals for EIT Community NEB partners, addressed to entities that implemented a project already awarded through any of the following previous calls:

✓ [NEB Citizen Engagement Activities 2022](#) [hereinafter Connect NEB projects]

✓ [NEB Co-Creation of public space through citizen engagement 2022](#) [hereinafter Co-create NEB projects]

✓ [Cross-KIC NEB Citizen Engagement 2021](#) [hereinafter Connect NEB projects]

✓ Cross-KIC NEB Capitalising Calls in 2021 [hereinafter Co-create NEB projects]:
- [Call for Regions, Cities or Affiliated Entities: Capitalising on existing public realm solutions](#) [EIT UM]
- [Capitalising on existing citizen engagement activities in re-designing the public](#) [EIT Climate]
- [Capitalise on existing EIT Food consumer engagement projects](#) [EIT Food]

The list of eligible partners to this Call can be found at Annex 1 and a core summary of the conducted projects can be found [here](#). We invite applicants to familiarise themselves with the eligible projects, and explore the lessons learns.

Based on the analysis of the completed deliverables of the EIT Community NEB funded projects BP21-22, this Enhance NEB Call aims to increase the scale and therefore the impact of Connect NEB and Co-create NEB projects, so as to benefit more people or/and to cover more territory.

Therefore, **this Enhance NEB Call is mainly open to EIT Community NEB partners listed in Annex 1.** It is addressed to consortium with **a minimum of two and a maximum of four partners from EIT Community NEB partners being one of them a city, a region, or an affiliated entity associated** with a city or region from

---

[2] Maximum 6 projects will be awarded based on the competitive selection stages defined in Section 4. Evaluation and selection process.

EIT Community NEB partners **or a new city, a region, or an affiliated entity (not coming from the EIT Community NEB)**, all located in the EU Member States or a Third Country associated to Horizon Europe[3]. In case a new city, region or affiliated entity is part of the project, it will participate as an associated partner and will not receive EIT Funding[4]. Furthermore, **any new affiliated entity** associated with a city or region that will join as an associated partner must submit a signed letter detailing its legal affiliation with said city or region.

These continued, or newly set public and private partnerships need to supply meaningful solutions to the EIT Community NEB Bauhaus Challenges[5].

Each entity awardee (except the associated partners that will not receive EIT funding) will receive a total EIT contribution amounting to 80% of the total project budget, with a maximum amount of EIT funding of €40,000 per project. The consortium must co-fund a minimum of 20% of the total budget.

The broader goal of the scale-up mechanism is to provide new pathways into more comprehensive cooperation with the EIT Community NEB ecosystem. Proposals submitted to this Call for Proposals must contribute to tackling the EIT Community NEB Bauhaus Challenges. All proposals need to embed and integrate all three core New European Bauhaus values (sustainability, aesthetics, inclusion) and all three key New European Bauhaus principles (multilevel, participatory, transdisciplinary approach) into their projects.

---

[3] Entities established in the United Kingdom and in Switzerland are eligible to participate and to receive EIT allocation up to 59.999,99 EUR per organisation and for the entire duration of the BP23-25.

[4] Associated partners may implement action tasks, but they will not request funding. Associated partners can, for example, contribute to the objectives of the action, gain visibility, or participate to ongoing (R&D) cooperation with a partner. As with any other participant that does not sign the contract, the consortium partners need to ensure (e.g. through the consortium agreement) that associated partners implement their action tasks in accordance with the contract. More information is in the Model Grant agreement.

[5] Based on the New European Bauhaus thematic axes, the EIT Community NEB has further defined 4 challenges. See further info in Section 2 Call requirements.

1. Call summary

Call for Proposals Main Features[6]	
Key dates of the call calendar	• *Call opening:* 31 May 2023 • *Call closing:* 10 July 2023 at 17:00 CET • *Eligibility and admissibility check:* July 2023 • *Evaluation of proposals:* July-August 2023 • *Communication of results:* August 2023 • *Tentative start of the projects:* 15th September 2023
Total estimated EIT Funding allocated to this Call and co-funding rate	€ 240,000 Six projects with up to € 40,000 of EIT Community NEB funding allocation. All proposals must have a minimum co-funding[7] of 20%.
Link to the submission portal	• The PLAZA platform will be available at the beginning of June 2023
List of documents to be submitted	• Application form is available on the PLAZA platform • Letter of affiliation if applicable
List of documents to take into consideration	1. Call Manual 2. The New European Bauhaus Compass 3. Guidelines for Applicants (steps to submit the application form) 4. Eligibility of expenditure 5. Appeal procedure 6. Financial Support Agreement (FSA) template 7. Horizon Europe Model Grant Agreement (Cross-KIC Strategic Synergies) 8. EIT Community NEB Project Implementation Handbook
Short summary of the topics to be addressed	The EIT Community NEB Challenges cover 4 main thematic axes: • Reconnecting with nature • Regaining a sense of belonging • Prioritizing the places and people that need it the most • The need for long-term, life cycle thinking in the industrial ecosystem
Evaluation criteria	The proposals will be evaluated based on the criteria listed below, as stated in Section 4 "Evaluation and selection process": • Excellence and novelty • Impact and social, economic, financial, and general sustainability • Quality and efficiency of the implementation

---

[6] Please note that this calendar is indicative. Dates may be subject to slight changes.
[7] Co-funding refers to financial contributions such as partners' own resources and/or other non-EIT Community NEB funding sources.

2 Call requirements

2.1 Who can apply

This Enhance NEB Call for Proposals is a Call addressed to EIT Community NEB partners that were part of a project funded through any of the following previous Calls in 2021 & 2022:

✓ NEB Citizen Engagement Activities 2022 [hereinafter Connect NEB projects]

✓ NEB Co-Creation of public space through citizen engagement 2022 [hereinafter Co-create NEB projects]

✓ Cross-KIC NEB Citizen Engagement 2021 [hereinafter Connect NEB projects]

✓ Cross-KIC NEB Capitalising Calls in 2021 [hereinafter Co-create NEB projects]:

- Call for Regions, Cities or Affiliated Entities: Capitalising on existing public realm solutions [EIT UM]

- Capitalising on existing citizen engagement activities in re-designing the public [EIT Climate]

- Capitalise on existing EIT Food consumer engagement projects [EIT Food]

The list of these eligible EIT Community NEB project partners can be found at Annex 1. A core summary of the conducted projects can be found here; we invite you to familiarise yourselves with the eligible projects, and explore the lessons learns. Additionally, all proposals must have a consortium that meet the following compulsory criteria:

A consortium with a **minimum of two and a maximum of four partners from EIT Community NEB partners being one of them a city, a region, or an affiliated entity associated** with a city or region from EIT Community NEB partners **or a new city, a region, or an affiliated entity**, all located in a EU Member State or a Third Country associated to Horizon Europe. Entities established in the United Kingdom and in Switzerland are eligible to participate and to receive EIT allocation up to 59.999,99 EUR per organisation and for the entire duration of the BP23-25.

In case a new city, region or affiliated entity is part of the project, it will participate as an associated partner and will not receive EIT Funding [8]. Furthermore, **any new affiliated entity** associated with a city or region that will join as an associated partner[9] must submit a signed letter detailing their legal affiliation with said city or region.

The lead partner must be an eligible EIT Community NEB partner listed in Annex 1.

This Enhance NEB Call encourages EIT Community NEB partners to strengthen existing relations or enter new collaborations with eligible partners. Therefore, find below some examples of potential consortium composition:

- The same consortium composition of EIT Community NEB partners, including a city, region or affiliate entity, as it was under BP 2021 – 2022 (Annex I)

- Newly established consortium composition combining EIT Community NEB partners, including a city, region or affiliate entity, from BP 2021 – 2022 (Annex I)

- The consortium composition combining EIT Community NEB partners from BP 2021 – 2022 (Annex I) and a **new** city, region, or an affiliated entity to a city or region located in an <u>EU Member State or a Third Country associated to Horizon Europe</u>[10]. In this case, these new entities will participate as associated partners in the project and will not be able to receive EIT Funding.

---

[8] Associated partners may implement action tasks, but they will not request funding. Associated partners can, for example, contribute to the objectives of the action, gain visibility, or participate to ongoing (R&D) cooperation with a partner. As with any other participant that does not sign the contract, the consortium partners need to ensure (e.g. through the consortium agreement) that associated partners implement their action tasks in accordance with the contract. More information is in the <u>Model Grant agreement</u>.

[9] Associated partners may implement action tasks, but they will not request funding. Associated partners can, for example, contribute to the objectives of the action, gain visibility, or participate to ongoing (R&D) cooperation with a partner. As with any other participant that does not sign the contract, the consortium partners need to ensure (e.g. through the consortium agreement) that associated partners implement their action tasks in accordance with the contract. More information in the Model Grant agreement.

[10] Entities established in the United Kingdom and in Switzerland are eligible to participate and to receive EIT allocation up to 59.999,99 EUR per organisation and for the entire duration of the BP23-25.

2.2   Scope of the activities

This Enhance NEB Call offers pathways for EIT Community NEB partners to expand and grow; boost desired collaboration within and between former Connect NEB and Co-Create NEB projects whilst also opening up to new partners collaborators to ensure the scaling or replication. Therefore, this Enhance NEB Call aims to strengthen the former Connect NEB and Co-Create NEB projects activities by scaling them up within their existing location or replicating their innovations elsewhere. The selected applicants will continue to have the opportunity to interact with the New European Bauhaus Community, NEBLab and other New European Bauhaus activities through sharing information, best practices, and, where relevant, results. Please visit the official New European Bauhaus website for more information.

The overall purpose of this Call is to resolve further challenges that the cities, peri-urban and rural areas face, focusing on four New European Bauhaus thematic axes:

1. Re-connecting with nature
2. Re-gaining a sense of belonging
3. Prioritising the places and people that need it the most
4. The need for long-term, life cycle thinking in the industrial ecosystem

These thematic axes are highly interconnected in support of delivering the New European Bauhaus approach. We are aiming for inspirational, beautiful, sustainable, and inclusive project proposals, which demonstrate new solutions that boost the transformation of our cities, peri-urban and rural areas in alignment with the New European Bauhaus core values (sustainability, aesthetics, inclusion) and principles (multilevel, participatory, transdisciplinary). For example, having access to green spaces can also bring people together. Affordable houses need proximity to the labour market to create a healthy and functional living ecosystem. Local improvement of a place cannot be done without taking the DNA and communities of the place into account.

In order to contribute in an agile manner, this Call for Proposals aims to further activate citizen-centred engagement activities. These scale-ups of citizen-centred engagement activities will serve not only to identify and prioritise up-to-date challenges but also to initiate a process to co-create further solutions for the most pressing challenges in alignment with the New European Bauhaus core values and principles in the long term.

Proposals must provide a deep understanding of the local ecosystem, including stakeholders, culture, and social dynamics, as well as expertise in citizen engagement activities and implementing innovation actions.

The EIT's 'knowledge triangle' *[higher education, research, and innovation]* is encouraged to be embedded in the projects through involving at least two sides of the knowledge triangle. In the *"2.7.1. Mandatory Key Performance Indicators (KPIs)"* section, some of the KPIs are linked to 'knowledge triangle' aspects and can be selected based on the focus of the projects. Especially the following two KPIs, the *"KSN01 Innovation pilot scaling"* and the *"EITHE08.1 Participants in non-labeled education and training"* KPIs which are interconnected with the EIT's 'knowledge triangle.' For some applicants, the 'knowledge triangle' can be met quite straightforwardly, for example, through those activities where educational centres work together with other institutions such as NGOs, industries, businesses, etc. Meanwhile, for some activities, e.g., citizen

engagement activities that do not focus on the 'knowledge triangle' might be out of scope. Overall, the 'knowledge triangle' integration is optional for projects, based on the focus of the project.

EIT Community NEB Challenges

Based on the above-mentioned New European Bauhaus thematic axes, the EIT Community NEB has further defined 4 challenges. All proposals must address **at least one** of these four EIT Community NEB Bauhaus challenges described below:

2.2.1 Challenge 1: Re-connecting with nature

The New European Bauhaus movement aims to create greater opportunities for contact with green public spaces that translate into better health and reduce income-related health inequalities. Nature-based solutions in cities can help address floods and other extreme weather events, whilst making the built environment more attractive. Climate action can improve air, water and soil quality and overall living conditions. The COVID-19 pandemic underlined the direct link between nature protection and physical and mental health for citizens. There is a need to go beyond a human-centred to a life-centred perspective, seeking inspiration from nature and learning from it.

Examples of specific types of activities that can be addressed are included in the following non-exhaustive list

- Urban greening, such as urban green corridors for active mobility, rethinking transport infrastructure, interacting with citizens to encourage the uptake of green solutions, co-creation of green space(s) in order to exploit their potential, such as better refresh/cooling an urban area, etc.
- (Re)naturalisation of degraded public areas, green areas, biodiversity, green and blue infrastructure, and urban furniture as assets promoting active mobility.
- Supporting and promoting green jobs and skills, and futures literacy, including life-long learning through nature-based solutions.
- Incorporating green aspects in decision-making mechanisms, developing green procurement protocols.
- Solutions to enhance crop yield and resilience, making use of more sustainable soil and/or crop management as well as other practices to increase plant tolerance to stress (abiotic, biotic), including climate change.
- Solutions with credible potential to reduce GHG emission or mitigate biodiversity loss from the agri-food production chain, including solutions targeting livestock, human diets, and resource stewardship.

2.2.2 Challenge 2: Re-gaining sense of community and belonging

The New European Bauhaus movement is about collective and private experience. Building bridges between people implies encouraging intergenerational solidarity, developing links between education and the arts in local environments, and improving common spaces and places to meet.

Examples of specific types of activities that can be addressed are included in the following non-exhaustive list

- Enhancement of the public realm and, degraded public areas through, accessibility and interconnection with more sustainable means of transport, encouraging multiple uses of public space by citizens, creating conditions for enhanced cultural exchange.
- Promotion of proximity economy activities allowing citizens to access key services and amenities within walking distance, strengthening connections and fostering healthy, sustainable, active mobility.
- Repurposing and/or refurbishing public space(s) which can act as a catalyst to rediscover local communities and integrate newcomers.
- Demonstrating the interconnectedness of sustainability, resilience, and community through multi-functional activities addressing all three in a mutually reinforcing manner.
- Enrichment of food culture with local identity, the authenticity of food as a means to reduce food fraud and boost consumer confidence on source and quality.
- Drive food supply-chain optimisation, reduce amount of food lost/wasted and change the shape of demand by setting up innovative systems that promote value-chain linkages.

2.2.3 Challenge 3: Prioritising the places and people that need it the most

The New European Bauhaus movement promotes the inclusion of all citizens, as well as of the places where they live. Beautiful and sustainable solutions have to be affordable and accessible for all. Special attention should be paid to the specific circumstances of groups and individuals who are the most vulnerable, for instance, at risk of exclusion or poverty or experiencing homelessness. Disadvantaged groups are at greater risk of energy poverty and air pollution and have less access to public transport. Inclusion also implies pursuing a Design for All approach to remove accessibility barriers to the built and virtual environments and to goods and services. The New European Bauhaus clearly goes beyond large city centres and encompasses places in all their diversity, including small villages, rural areas, shrinking cities, neglected city districts, suburbs and de-industrialised areas. This calls for planning to avoid spatial segregation of social groups and create a sense of togetherness. The various parts of a city, a village or neighbourhood should be connected.

Examples of specific types of activities that can be addressed are included in the following non-exhaustive list

- Addressing poor transport connections between rural and urban areas.
- Solutions aiming at universal mobility as a key enabler for social inclusion, allowing everyone to move freely within cities regardless of gender, race, beliefs, or disability.
- Climate justice initiatives focusing on equitable distribution of housing and living conditions.
- Green solutions addressing social issues, in line with the "build back better" principle.
- Co-design and test with citizens affordable food products and/ or ingredients customised to vulnerable target groups (elderly, children, etc.), which could include data standardisation for targeted nutrition.

- Develop fast, non-invasive, and scientifically reliable diagnostic tools, monitoring devices, consumer interfaces or educational tools to enable users to make healthier and more sustainable food choices (at the level of consumers and/ or care providers).

2.2.4 Challenge 4: The need for long-term, life cycle and integrated thinking in the industrial ecosystem

The New European Bauhaus movement promotes an economy based on circularity to tackle unsustainable use of resources and waste, including uses for obsolete buildings or infrastructures. Addressing these challenges concerns the entire industrial ecosystem, from production to delivery and consumption, with a circular economy mind-set. Recovered and renewable materials should be better recognised by all relevant disciplines and become part of design paradigms. The use of sustainably produced and procured nature-based building materials, such as wood, bamboo, straw, cork or stone should be improved. New production technologies should help reduce the carbon footprint of steel or cement, recycle otherwise wasted textiles and accelerate the green transition of energy intensive industries. New business models, bioeconomy, social economy approaches and Design for Sustainability can support the transformation of sectors such as textiles, tourism, waste management or energy production. The digital transition will play a systemic role in the development and implementation of the New European Bauhaus.

Examples of specific types of activities that can be addressed are included in the following non-exhaustive list

- Circular mobility including shared mobility, such as satisfying user needs without transferring ownership of physical products through shared solutions.
- Solutions for the sensibilities and aesthetics of the circularity concept as user experience; combining circular and cleantech solutions for long-term effect.
- Leverage existing innovations promoting circularity and market opportunities in the agri-food systems and a circular model maintaining the value of food in the economy for as long as possible. Co-creation of innovative, sustainable packaging concepts to reduce food spoilage.

2.3   Expected outcomes, outputs and impacts

All submitted proposals are expected to deliver a high-quality scale-up or replicability based on the 2021 & 2022 projects' achievements. In terms of scale-up strategy, the expected outcome targets are as follows:

- **Outcome A:** Higher/amplifying/completing impact in the <u>same location</u> with a more holistic approach.
- **Outcome B:** Higher/amplifying impact <u>beyond the former site at a new location</u> (e.g. neighbourhood/district/town/city/region, etc.) by replicating/transferring the project activities in a new location).

Both outcomes A & B are eligible to boost desired **collaboration within and between Connect NEB and Co-create NEB projects**, whilst opening up to new partners (as defined in section 2.1 Who can apply e.g.: associated partner without EIT funding) to ensure scaling or replication.

In addition, all submitted proposals addressed to any of the 4 challenges need to **meet at least one of the 3 following expected outputs and impact:**

1. **Products and services (including rapid product prototypes)**:
   o Enhancing nature-based-solutions, promoting green spaces and supporting urban greening.
   o Responding to citizens' real needs in urban, and regional spaces, as well as improving accessibility and quality of experience of citizens in their daily lives, i.e., leisure, working, moving around and commuting etc.
   o Delivering both online and offline (in person) support, as well as public and private realm infrastructure and facilities with a focus on specific vulnerable populations, i.e., elderly, children, ethnic minorities, marginalized groups etc.
   o Promoting long-term use and thinking, and reduce by design; also, maintenance, reusing, refurbishing, remanufacturing repurpose and recycling of resources and waste, including digital and monitoring tools, as well as improvement of current state-of-the-art industrial manufacturing processes.

2. **Co-design of public space:**
   o Green spaces and co-stewardship of green spaces and natured-based-solutions through public-private partnerships and social participation.
   o Public realm and commons with civil society and other stakeholders to favour diversity while strengthening inclusivity and equitability, as well as promoting co-ownership and care of public and private spaces.

3. **Social activation and non-labelled education and training activities:**
   o On nature-based solutions, access, and amplification of green spaces, as well as their collective stewardship.

- o Multi-stakeholder activities enhancing urban regeneration in less favoured areas, including most polluted zones, neglected or dangerous neighbourhoods, remote areas with poor communication, and districts with limited services.
- o Development and implementation of social interventions encouraging cultural understanding and connection between different social groups that would otherwise not meet.
- o Activities enhancing the experience of belonging through shared orientation towards nature protection, sustainability and resilience.
- o

All the above-targeted outcomes and outputs aim to influence local policy/strategies or achieve a considerable resonance among the local policymakers/strategic planners.

2.4   Mandatory Key Performance Indicators (KPIs)

All submitted proposals must contribute to the minimum expected target of the listed mandatory KPIs to be eligible. Each proposal must address a minimum of 2 mandatory KPIs out of the below listed, as well as indicate the expected minimum target value for each selected KPI. The KPIs may be subject to be amended depending on the scope of the project and the designated coordinating KIC during the conditions clearing.

KPI Code	KPI name	KPI description	Minimum Target expected
KSN01	Innovation pilot scaling	Number of innovation products and/or processes scaled by expanding or replicating pilot or small-scale project to reach more people and/or broadening the effectiveness of an intervention. Reporting requirement in the final performance report as structured data on: List incl. the type, title and short description	1
KSN02	Demonstrations/ pilots/ living labs within a project that actively involve citizens and/or local associations	Actively engaged an appropriate amount of citizens/community representatives of various age and social groups in running a demonstration/successful pilot/living lab* to encourage experimentation, research and the development of solutions to city challenges and issues; and, where relevant: Mobilised local citizen associations and community groups to help maximise reach out to citizens. The aim is to ensure acceptance of measures, raise awareness for opportunities or restrictions that come with	1

KPI Code	KPI name	KPI description	Minimum Target expected
		measure implementation, and enhance ownership of measures. *****_Living labs are defined as user-centred, open innovation ecosystems based on a systematic user co-creation approach integrating research and innovation processes in real life communities and settings. Living labs place the citizen at the centre of innovation._ Reporting requirement in the final performance report as structured data on: List incl. the type, title, number of engaged participants and short description. In Annex the signed and dated participant lists are mandatory with family names and signatures according to GDPR.	
KSN03	# Public realm improvements	Public realm is a platform for life with a diversity of urban functions to live, work, shop, relax, encounter and play, commonly defined as all areas between buildings including streets, boulevards and open squares that are accessible to the public. This KPI includes both: a) small-scale and temporary changes, using low-cost and scalable interventions, as the first step in informing long-term systemic change, and b) permanent investment as part of a public realm action plan and/or a walking and cycling strategy, and/or parking interventions Reporting requirement in the final performance report as structured data on: List incl. the type, title and short description	1
CL04	Funding leveraged to support scale-up / diffusion of innovations to tackle climate change	Financing leveraged to support the scale-up/diffusion of innovations to tackle climate change by: • Tracking funding pathways for projects and start-ups in our portfolio. • Monitoring co-investment, third-party funding, influenced funding and our influence on financial models through annual reporting routes. • Through developmental and ex-post evaluation, and AI/big data tools.	€ 1,000

KPI Code	KPI name	KPI description	Minimum Target expected
		Reporting requirement in the final performance report as structured data on: List incl. the type, title, amount and short description	
CL05	Strengthened resilience to the unavoidable impacts of climate change	Number of people with strengthened climate resilience. With respect to resilience, measures associated with new/improved climate risk management policies, new protection tools/measures, changes to average annualized losses can all help support target measurement. Reporting requirement in the final performance report as structured data on: List incl. the type, title, number of participants and short description. In Annex the signed and dated participant lists are mandatory with family names and signatures according to GDPR.	40
EITHE08.1	Participants in non-labelled education and training	Number of successful participants in EIT professional development courses, workshops, online training courses and other education/training activities delivered or in a process of delivery (by country and type of programme), including data on country of citizenship and gender. Only participants, who successfully finished the programme, will be counted. For this KPI, only those education and training activities which have clearly defined learning outcomes, and which carries out competency assessment method are applicable. Reporting requirement in the final performance report as structured data on: • Year of reporting • Title of course/training/education/workshop activity delivered. • Type of the programme • Key learning outcomes, competencies and results of the programme • Number of participants enrolled in the reporting year (and breakdown of participants by country of origin) • Number of participants who successfully finished the course in the reporting year • Is the training/education delivered through the HEI CBI	25

KPI Code	KPI name	KPI description	Minimum Target expected
		In Annex the signed and dated participant lists are mandatory with family names and signatures according to GDPR.	

The selected KPIs must be delivered during the project implementation and reported in the final report.

2.5   Project duration

Projects selected to this Call for Proposals will have a **duration of up to 9 months**. The expected implementation period is from September 2023 until May 2024 at the latest.

As indicated in the EIT Community NEB Project Implementation Handbook 2023, in case the project requires additional time to complete its workplan and/or achieve the KPIs, the Project Leader will have to request a project extension to the EIT Community NEB. Project extensions shall be no longer than 2 additional months. If the extension is approved, the project will be allowed to continue with the implementation without any additional EIT funding. No extension can be granted beyond 30th September 2024.

2.6   Financial aspects

2.6.1 EIT funding allocation and co-funding rate

The total **maximum EIT funding** allocated to this Call is € **240,000**. Six projects will be selected in this call with the maximum funding of € 40,000 per project.

The funding rate that applies to the selected projects is 80% and up to € 40,000 for each project, leaving the remaining 20% to be co-funded by the consortium. Co-funding refers to financial contributions such as partners' own resources or and/other non-EIT Community NEB funding sources.

Accordingly, all proposals must have a minimum co-funding rate of 20%. For example, for a proposal with a total budget of € 70,000 the maximum EIT Community NEB contribution to be received will be € 40,000 (57%), with a total co-funding of € 30,000 (43%). Co-funding above 20% will be positively assessed during the selection process.

For information on the eligibility of costs of your project's budget, please refer to the document *Eligibility of expenditure* published on the call webpage.

2.6.2 Financial sustainability

Within the EIT Community NEB, the KICs have developed a Financial Sustainability (FS) Strategy, to enable the KICs to gradually become financially independent from EIT funding. These FS plans are based on a mix of different mechanisms, such as revenue share and equity stakes. The FS strategy aims to create a perpetual innovation fund that will sustain innovation beyond the predefined cycles of European Commission block grants. This financial independence will be based on a mix of both active earned income and passive investment revenue.

For the Scaling-up of Connect NEB and Co-Create NEB projects, even if the provision of a Financial Sustainability Mechanism (FSM) for EIT Community NEB is not a mandatory element for 2023-2024, it will be positively assessed as part of the evaluation criteria (see section 4.2. Evaluation of proposals). Accordingly, each applicant should have a credible operational strategy for their own product/service/solution evidenced by a credible operational forecast for their specific product/service/solution to be scaled/replicated during the project implementation. We are aiming for long lasting effects and sustainability of the project, ensuring that the activities continue after the completion of the EIT Community NEB project.

In the Application form, applicants are encouraged to outline the potential economic impact, a potential planned period of project continuation (e.g., 1-2-3 years or beyond), and how is it planned to be achieved (e.g., based on viable operational model, or fresh funding from other grants, etc.). Measures on exploiting the obtained data should be described, including how this could potentially be used as a project's marketing and/or sales plan.

2.7   Project implementation, monitoring and reporting

All Project Leaders and consortium partners will need to comply with the rules and procedures defined in the Horizon Europe MGA during the project implementation. In particular, they will have to comply with the rules and procedures set out in the EIT Community NEB Project Implementation Handbook 2023 published on the call webpage and the Financial Support Agreement that each partner will have to sign with the coordinating KIC.

In addition, all Project Leaders and consortium partners will need to comply with the rules and procedures defined in the Horizon Europe MGA, with special attention to Article 16 (Intellectual Property Rights) and Article 17 (Communication, Dissemination and Visibility). Most particularly, all project activities must follow the branding guidelines and obligations as set out in MGA Article 17. All communication and dissemination activities funded by the grant must display the special logo of the EIT Community New European Bauhaus with the following text: "EIT Community New European Bauhaus [project name] is supported by the European Institute of Innovation and Technology (EIT), a body of the European Union") and related communication materials must include the official logo of both: New European Bauhaus and EIT Community New European Bauhaus logos.

EIT Community NEB will provide mentoring for the selected projects to enlarge the impact of the activity through NEB values/principles and, to assist in designing business model/scale up within NEB values/principles.

2.7.1 Mandatory deliverables

To ensure the successful implementation of the project, and consequently to have the right to receive the EIT Community NEB funding according to its defined value, the following minimum mandatory deliverables are expected to be submitted and successfully approved by the EIT Community NEB.

Deliverable	Description[11]
Intermediate report	Report presenting activities implemented during the first half part of the project, including challenge description, initial outputs according to the submitted work plan, progress so far, applied methodology, stakeholder involvement, identification of potential risks and mitigation measures if required, etc.
Final performance report, including report on KPIs	Report presenting activities implemented during the whole period of the project and final conclusions. - Overall progress of the activity: brief description, methodology, work plan and achievement. - Outputs and outcomes. - Potential impact on local policies: feedback from local authorities and impact on their strategy. - Conclusions: overall management and recommendations for further replication and/or upscaling the realised activity. - Demonstrating the evidence of the KPIs publications/dissemination/communication events (title, description, views/participants, events pages, agenda, pictures, signed and dated consent forms with family names and signatures anonymised, signed and dated participant lists with family names and signatures anonymised, pictures/videos/graphic/image/ infographics) that they were able to achieve according to the pre-defined targets of the application.

Minor additional deliverables may be needed (e.g. slide decks and presentations), depending on the project's scope, and/or the product/service solution.

---

[11] Recommended requirements for compliance.

3. General proposal preparation and submission

3.1 Mandatory documents

All proposals need to submit an application form through PLAZA before the deadline, together with a signed letter of affiliation (if applicable).

In particular, all proposals are expected to include the following information as part of the Application form:

- A description of the **proposed solution or methodology** to be piloted, and a high-level execution and management plan of the pilot. This includes a description of **strategic importance & reasons to scale-up/replicate the project** (WHY)**, who would benefit** (for WHOM: which social group(s) are targeted)**, how to achieve the outlined goals** (HOW)**, and the main role taken up by each partner of the consortium** (by WHOM).
- An **end-user engagement plan** that targets specific audiences, including a gender perspective or other minority/vulnerable groups during the pilot, and a dissemination and communication plan on the pilot activities, impacts and outcomes. This includes a description of the **social demand**.
- A description of **performance metrics to be used** to objectively evaluate the **sustainability, inclusivity and aesthetic values**. All proposals need to embed and integrate all three core New European Bauhaus values (sustainability, aesthetics, inclusion) and all three key New European Bauhaus principles (multilevel, participatory, transdisciplinary approach) into their projects. These metrics should allow for the quantification of the impact during the project.
- A description of **potential economic impact** of the pilot would be assessed positively. Measures on exploiting the obtained data should be described, including **how this could potentially be used as a project's marketing and/or sales plan**.

Cities, regions or affiliated entities must provide evidence of at least one of the following options when developing the proposal:

- o **Option A:** An approved public realm infrastructure or availability of public space where the project proposal or solution can boost its implementation and improve their qualities by implementing the New European Bauhaus approach.

And/or:

- o **Option B:** Reference to an approved official local strategic document with an explanation of how and at what level the project contributes to achieve its targets, including a realistic and achievable plan. The project must provide clear evidence of its commitment and involvement in the improvement of the targeted segment/area. Some examples of specific types of local level official strategic documents that can be addressed are included in the following non-exhaustive list:
  - o Commitment statement of the city/region on the relevant segment/area targeted by the project
  - o Sustainable Urban Mobility Plans (SUMPs)
  - o Sustainable Energy and Climate Action Plans (SECAPs)
  - o Zero Pollution Action Plan for 2030
  - o Waste management plans and/or waste prevention programmes
  - o Circular Economy Strategy or Action Plan
  - o Strategy on Adaptation to Climate Change
  - o Local Action Plan on green urban areas and green infrastructure Sustainable Land Use & Soil strategy
  - o Nature Restoration Plan
  - o Farm to Fork strategy
  - o Biodiversity strategy for 2030
  - o Any action plans that can be supported by the project

3.2 Support on proposal preparation

Guidelines for Applicants is published on the call webpage and provides comprehensive information and instructions on how to prepare and submit a proposal for this Call.

To help applicants with the preparation and submission of their proposals, the EIT Community NEB will host one live Call Info session and matchmaking event. It will be focused on the Call content and, the challenges, as well as on the submission and evaluation procedures and the financial aspects. Please find the date and the link to register in the table below:

Type of event	Topic covered	Date and time (CET)	Access to platform
Online webinar	**Call info session and matchmaking event:** Scope and challenges of the Call, call calendar, evaluation and selection process, financial aspects and PLAZA submission tool, tips to applicants, matchmaking support for the EIT Community NEB partners.	14 June 2023 at 10 am.	**MS TEAMS** (LIVE) For the event, please register **here** before 9th June 2023.

			YouTube (Recording to be available after)

In parallel to the online information and matchmaking session, all applicants may contact the EIT Community NEB to resolve any concerns or doubts on the general/technical procedures and Call content. These are the key contact details of the EIT Community NEB related to this call. **In the email subject please insert Enhance NEB Call and acronym of your project.**

Type of contact	Email
Legal, Financial, Administrative and general procedures, including questions about PLAZA submission tool	pmo@eiturbanmobility.eu
EIT Urban Mobility	maria.marrugat@eiturbanmobility.eu
EIT CLIMATE KIC	Natalia.vera@climate-kic.org
EIT FOOD	Marianne.lemberger@eitfood.eu

3.3 How and when to apply

Before starting a proposal, all applicants (Project Leader and consortium partners) must register on the following two platforms:

- The EU Funding & tender opportunities portal in order to obtain the 9-digit Participant Identification Code (PIC number). If the participant already has a PIC number, there is no need to register again.
- The EIT Urban Mobility PLAZA tool.

Please read carefully the registration and submission processes outlined in the *Guidelines for Applicants.*

The following documentation must be submitted by the Project Leaders through the PLAZA e-submission platform no later than **10 July 2023, 17:00 CET:**

- Application Form
- Letter of affiliation only for those new affiliated entity to a city or region that are not former EIT Community NEB partners
- Optional: Annexes to the application form (figures, graphics, photos etc.)

Any proposals submitted after the set deadline will be ineligible.

4. Evaluation and selection process

Once the applicants have submitted their proposals, the EIT Community NEB team will proceed to:

- Check eligibility and admissibility of those proposals and, if successful:
- Initiate the evaluation of the content by the EIT Community NEB and external experts.

4.1 Eligibility and admissibility check

A proposal will be eligible if:

1) Completeness	The submitted proposal is completed and submitted in time by the Project Leader via the PLAZA submission tool in English with all its mandatory sections.
2) Applicants' registration	Applicants (including all consortium partners) are registered in both the EU Participant Portal (PIC number) and in the PLAZA submission tool (PIF fully completed). **NB: The lack of any information within the Partner Information Form in PLAZA by one or more applicants, may result in the complete ineligibility of the project.**
3) Applicants' eligibility	- All Lead Partners and Consortia partners are EIT NEB Community partners from EU Members States or Third countries associated to Horizon Europe. - Any new associated city, region, or an affiliated entity to a city or region are from EU Members States or Third countries associated to Horizon Europe.
4) Consortium composition	A consortium with a minimum of two and a maximum of four partners from EIT Community NEB partners being one of them a city, a region, or an affiliated entity associated with a city or region from EIT Community NEB partners or a new city, a region, or an affiliated entity, all located in a EU Member State or a Third Country associated to Horizon Europe. The lead partner must be an eligible EIT Community NEB partner listed in Annex 1.
5) Letter of affiliation	Signed letter of affiliation requested only to new affiliated entities to a city or a region to prove their legal link to a city or a region.
6) Co-funding rate	All proposals must have a minimum co-funding rate of 20 %.

7) KPIs addressed	All proposals must identify and address at least 2 of the mandatory KPIs.		
	KPI Code	KPI title	Minimum Target
	KSN01	Innovation pilot scaling	1
	KSN02	Demonstrations/ pilots/ living labs within a project that actively involve citizens and/or local associations	1
	KSN03	# Public realm improvements	1
	CL04	Funding leveraged to support scale-up / diffusion of innovations to tackle climate change	€ 1,000
	CL05	Strengthened resilience to the unavoidable impacts of climate change	40
	EITHE08.1	Participants in non-labelled education and training	25
8) Mandatory deliverables	The submitted proposal includes the mandatory deliverables identified in section 2.7.1.		

Proposals containing one or more ineligible elements will receive an official communication from the EIT Community NEB, setting out the outcome of the admissibility and eligibility check and explaining why the proposal failed to meet the criteria.

In the case of missing or incorrect information linked to co-funding, KPIs, letter of affiliation, mandatory deliverables and partner registration, applicants will be given 5 calendar days from the official communication for the completion of the application. If the applicants respond positively to this requirement and within the time limit, the proposals will be sent to the next step of the evaluation process (see section 4.2 Evaluation of proposals).

If the applicants fail to respond or respond after the deadline, the proposals will remain ineligible and will not be further processed. In the case where one single consortium partner is ineligible, this partner will step down. EIT Community NEB will then check if the proposal is still eligible or not. The Lead Applicant will be informed accordingly.

The Project Leader of any proposal deemed inadmissible/ineligible who disputes the ineligibility decision, may appeal. This appeal must be made within 5 calendar days of the official EIT Community NEB notification of ineligibility (see document *Appeal procedure* published on the Call webpage).

4.2   Evaluation of proposals

The purpose of the evaluation is to assess the excellence, impact, implementation, and overall quality of each proposal that successfully passes the eligibility and admissibility check.[12]

This evaluation process will consist of (1) the quality evaluation carried out by EIT Community NEB independent experts evaluators and (2) the Portfolio selection done by the EIT Community NEB Selection Committee.

Each evaluation phase comprises different groups of criteria and sub-criteria which will be assessed according to the following scores:

Score		Description
0	None	The information requested is missing or incomplete
1	Very poor	The information provided is considered irrelevant or inadequate compared to the specific call provisions
2	Poor	The information provided lacks relevant quality and contains significant weaknesses, compared to the specific call provisions
3	Fair	The overall information provided is adequate, however, some aspects are unclearly or insufficiently detailed, compared to the specific call provisions
4	Good	The information provided is adequate with sufficiently outlined details, compared to the specific call provisions
5	Excellent	The information provided is outstanding in its details, clarity and coherence, compared to the specific call provisions

4.2.1 Quality Evaluation

During the Quality Evaluation phase, three independent Expert Evaluators will be invited to evaluate the proposals and produce a Summary Evaluation Report (SER) per proposal assessed. The result of each SER will be sent to the EIT Community NEB Selection Committee.

---

[12] According to the general principles for the evaluation as per MGA Annex 5: avoidance of conflict of interest and compliance with the principles of transparency, non-discrimination and sound financial management

The proposals are evaluated and scored against the criteria listed below:

Excellence and novelty	Max. scoring (25)
The proposal objectives and activities are SMART (Specific, Measurable, Achievable, Realistic and Time-Bound).	5
The elements of the proposal are coherent and logically linked.	5
The proposal provides a clear description of strategic importance & reasons to scale-up/replicate the project (WHY). The scale-up/replication activities, outcomes and results clearly prove the capacity to successfully address the objectives of the project. (HOW)	5
The proposal represents an innovative step forward regarding the current state of the art, including enhancements as defined in section 2.2.	5
The proposal demonstrates its need and relevance for society, target group, or market. The proposal demonstrates the social demand.	5
Impact: social, economic, financial, and general sustainability	Max. scoring 25
The proposal provides an end-user engagement plan that targets specific audiences including gender perspective and other minority/vulnerable groups during the pilot.	5
Proper dissemination and communication plan on the activities, impact and outcomes.	5
The proposal's expected impacts are measurable and clearly defined. Adequate performance metrics of the proposed solution are provided to objectively evaluate the sustainability, inclusivity and aesthetic value.	5
The proposal's potential economic impact is outlined to ensure potential future durability and transferability. Measures on exploiting the obtained data should be described, including how this could potentially be used as a project's marketing and/or sales plan.	5
The proposal demonstrates the relevance of the benefits of the project or solution to the city´s planned public realm or the city's strategy and/or, local action plan.	5
Implementation: quality and efficiency	Max. scoring 25
The workplan is aligned to the achievement of proposal objectives, KPIs and expected results. The proposal presents a clear risk assessment and contingency plan.	5
The work plan of the proposal integrates societal inclusion actions.	5
The proposal properly identifies deliverables, milestones, outcomes and outputs including their timing and relevance for the overall project.	5
The proposal budget is clearly outlined, justified and represents value for money.	5
The proposal identifies management structures to guarantee an effective execution and management of the project. The applicants represent the right competencies in accordance with the scope of the proposal and have differentiated and clear roles and responsibilities.	5

The overall quality evaluation of the proposal is based on the evaluation's three criteria scores (Excellence, Impact, Implementation). The total scoring of 75 points is distributed as follows:

	Max score
Excellence	*25 points*
Impact	*25 points*
Implementation	*25 points*
Total points	*75 points*

If proposals receive the same scoring, funding prioritisation will be based on the following order:

- Geographical spread within the EIT Community NEB Portfolio
- Long lasting financial sustainability
- Co-funding rates higher than 20%

This will be specifically brought to the attention of the EIT Community NEB Selection Committee.

4.2.2 Portfolio Selection

The EIT Community NEB Selection Committee will select the projects to be funded. This final portfolio selection will be based on the Call Report, the SERs and the ranking list of the evaluation results list. Only proposals ranked **equal or over 50 points (threshold)** will be passed to the Selection Committee.

The Selection Committee will agree on the final list of projects proposed for funding (portfolio selection), as well as the projects proposed for inclusion in the reserve list and proposed for rejection.
In addition, the EIT Community NEB Selection Committee may provide the list of strategic conditions to be addressed by the applicants of these selected projects and, make recommendations to improve the proposals.

As part of this process, the EIT Community NEB may also issue technical conditions that will be included in the conditional offer.

4.3 Communication of results to applicants

The Project Leaders of all applicants will receive an email notification from the EIT Community NEB with the evaluation results, after the portfolio selection process. The email notification will include the SER of the project proposal and the results on the selection process.

If the proposal is pre-selected, the evaluation results may include a set of recommendations/conditions. The communication will set up a defined and non-negotiable deadline to address to recommendations/conditions. The Project Leader of a pre-selected proposal under conditions will need to respond and update the proposal according to these recommendations/conditions within this timeframe.

If the Project Leader fails to comply with the provided recommendations/conditions or does not respond by the time allocated, the EIT Community NEB Selection Committee reserves the right to withdraw the conditional notification. In such a case, the next proposal on the portfolio list will be contacted following the ranking list.

4.4 Appeal on Evaluation Results

The Project Leader of a rejected proposal, who disagrees with the decision may only appeal in the event where a SER comment is in clear contradiction with the information provided in the proposal. In this case, the Project Leader will have 5 calendar days after receipt of the final evaluation results to submit an appeal to the Evaluation (see document *Appeal procedure* published on the Call webpage).

Annex I

List of eligible EIT Community NEB project partners.
